

Conference on the History of Engineering

20.3.2017

The Italian Association of History of Engineering, the National Council of Engineers, The School of Polytechnic and Basic Sciences and the Interdepartmental Centre of Engineering for Cultural Heritage of University of Napoli Federico II and the Councils of Engineers of Napoli and Salerno organize the 7th International Conference on the History of Engineering 3rd International Conference, to be held in the spring of 2018 in Naples.

PURPOSES

The Conference aims to promote the knowledge of Engineering History since its ancient origins, its general aspects and those particular episodes that have marked its path along the centuries. A second key objective is to promote a broad scientific debate on the development of the history of this branch of knowledge, with the direct contribution of engineers and the involvement of scholars of engineering, historians, architects and archivists.

MAIN TOPICS

History of scientific and technological research

History of building construction, public works and infrastructures

Technical and scientific aspects of industry and industrialization

Evolution of the profession and role of engineering in society (from construction engineering to systems engineering)

Evolution of the relationship between the engineers and the institutions

Engineers, cultural heritage and the environment.

All information are available on AISI website:

www.aising.eu
